MEG, Mechanical Equipment Group, was established as an identity to bring together our specialised companies; Chain & Drives, Inquip, Techquip, Parts Book, Tank Enviro Systems & Automation & Control, and provide our clients with the complete solution for mechanical equipment & engineering services.

Our goal is to provide Design > Supply > Installation > Maintenance across a large range of industry sectors utilising Bulk Materials Handling, Power Transmission, Water Treatment and Automation.

Our team provides 24/7 experienced personalised technical services. We also offer direct e-commerce access & supply solutions to our manufacturers & supply partners globally through our company, Parts Book.

With the advantage of six companies, MEG now provides a larger range of quality & great value products, technical 3D-design, consulting, installation & maintenance services; both on our premises or onsite within Western Australia and New South Wales; to our ever growing customer base.

To assist our customers, we also offer fast delivery from our distribution partners located throughout major centres in Australia.

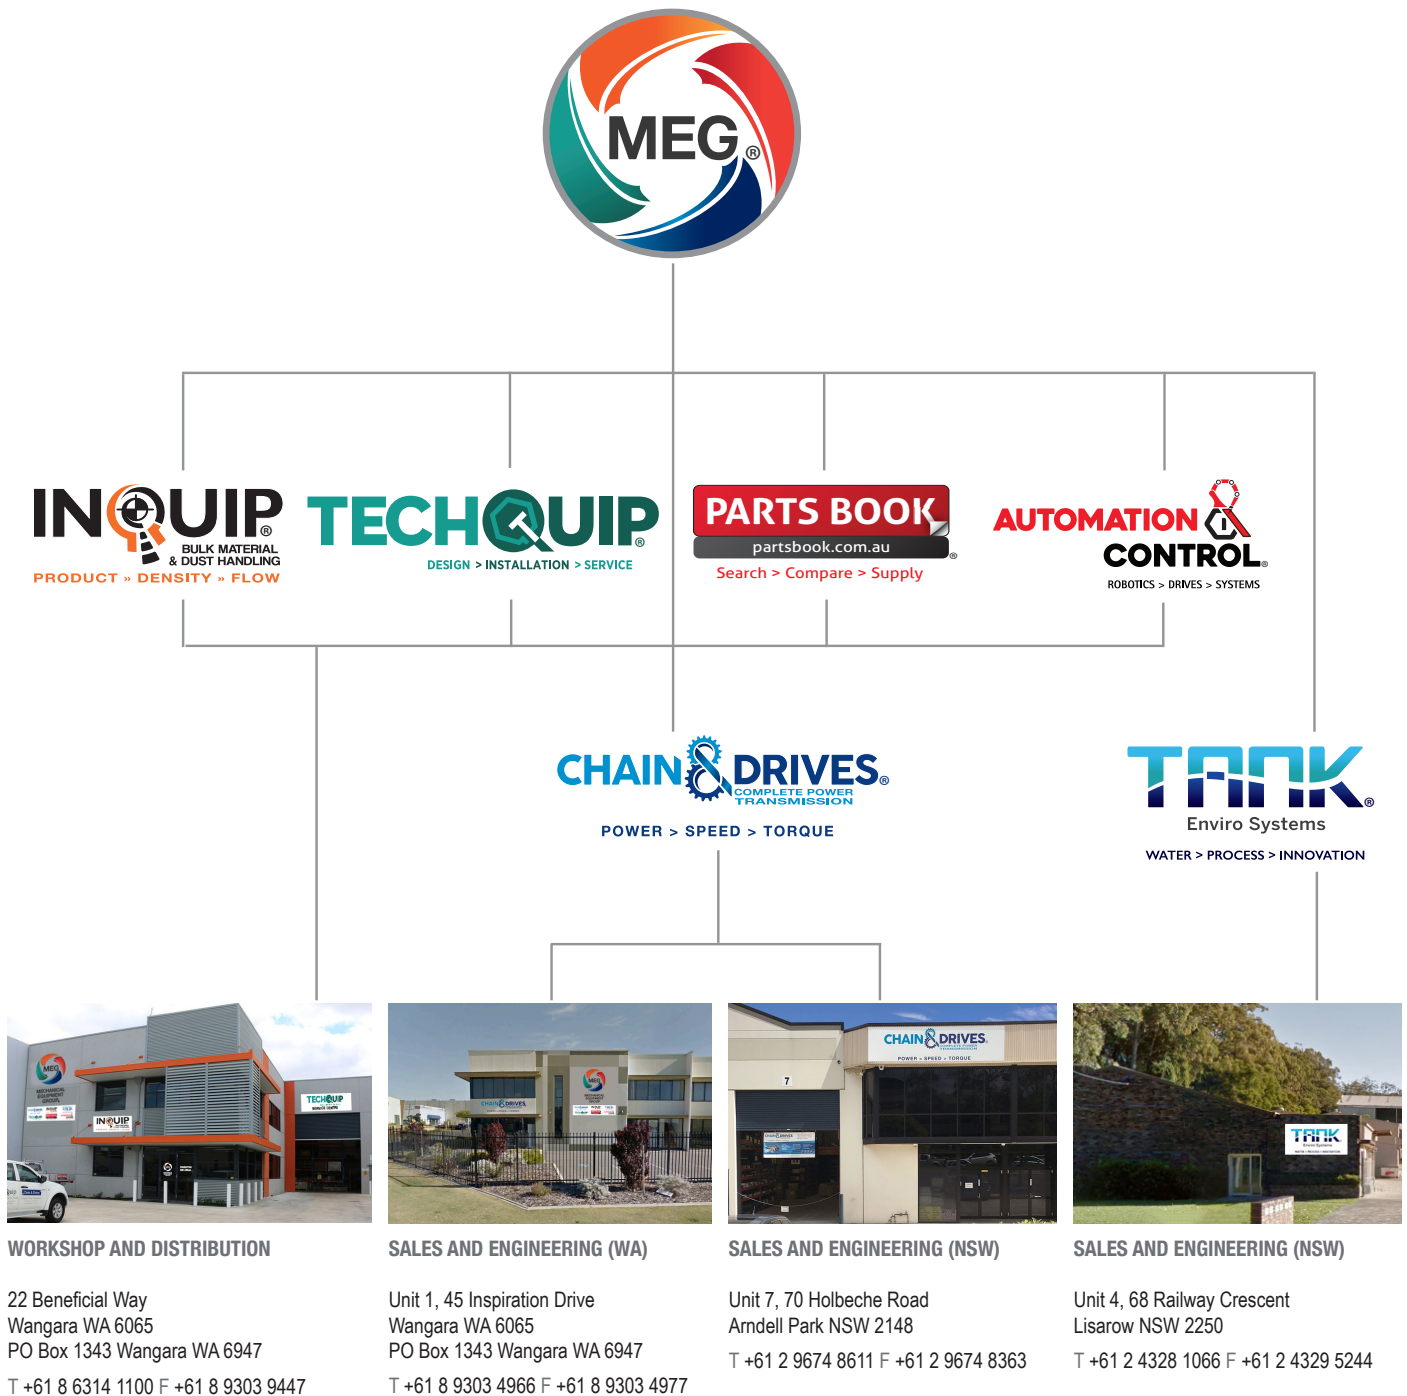

Welcome to MEG, where we aim to Innovate > Build > Support. Contact our friendly team today for assistance.

MEG Organisational Structure

MEG Core Values

A culture defines who we are.

It sets forth aims and principles of a united group. Our success is based on the shared values and commitment of the people who are building our company for the future, on developing new technology, on discovering creative and innovative ways to do things, on improving the value of our services to our customers, on building strong relationships with our customers, and on seeking excellence in everything we do.

HONESTY & INTEGRITY

We take family values as a business template. Integrity, trust, knowledge and goodwill underpin every activity from enquiry to delivery and beyond. We believe our successes can all be traced to family values and an unshakeable commitment to look after our employees, customers and industry partners.

CUSTOMER SERVICE

Customer service is our main core value. This is not only measured on the results and benefits our products and services provide which we supply to you, but in the understanding of your business. Through this understanding and partnership we are able provide outstanding service to our customers.

Our company has an understanding of many industry sectors. Daily contact with maintenance, planning and procurement specialists keeps every member of our team tuned in to customer specific needs. With an unlimited global reach and reliable business partners, MEG is a "Can Do" company that listens to problems and then focuses on the most practical cost-effective solution. Imaginative design capabilities, lateral thinking, rigid benchmarking and an ability to overcome problems makes our company an outstanding business partner.

POSITIVE ATTITUDE & EXCELLENCE

Our Company is a place for "Can-Do" people. A positive attitude empowers us. A positive attitude is the foundation for excellence.

TAKE PRIDE

What we do affects who we are. Each of us brings special talents and areas of expertise to the company. Our company's values grow out of each individual's values. Our company's results are merely the accumulation of our singular results. We all make a difference.

KNOWLEDGE & SKILLS

It does not take long for skills and knowledge to become outdated in a fast-changing world. We must constantly retool ourselves, become perpetual students. Delve deeper. Keep learning. Share our knowledge. MEG believes training our staff is the key to successful careers.

CORPORATE CITIZENSHIP

Get involved. Being a good corporate citizen means we don't just stand on the sidelines and observe. Being a valued member of a community means giving something back to it.

CARE ABOUT OTHERS

Strong teams are built on personal relationships and genuine caring for each other. We ask co-workers how they are doing and listen to what they say. Clear communication and a sense of teamwork is critical in a competitive environment. Our commitment to our culture and to our people is our key to success.

CONTINUOUS IMPROVEMENT

In every application there is always room for development and continuous improvement. MEG utilises its experience to constantly offer our clients the latest innovations and solutions.

Our sector knowledge and specialised product development approach provides you with a level of service and results that our clients rely on to achieve greater productivity and results.

In developing this process we have an improved understanding your business and application requirements. With this higher level partnership and understanding we can offer solutions that are efficient, competitive and beneficial to your business.

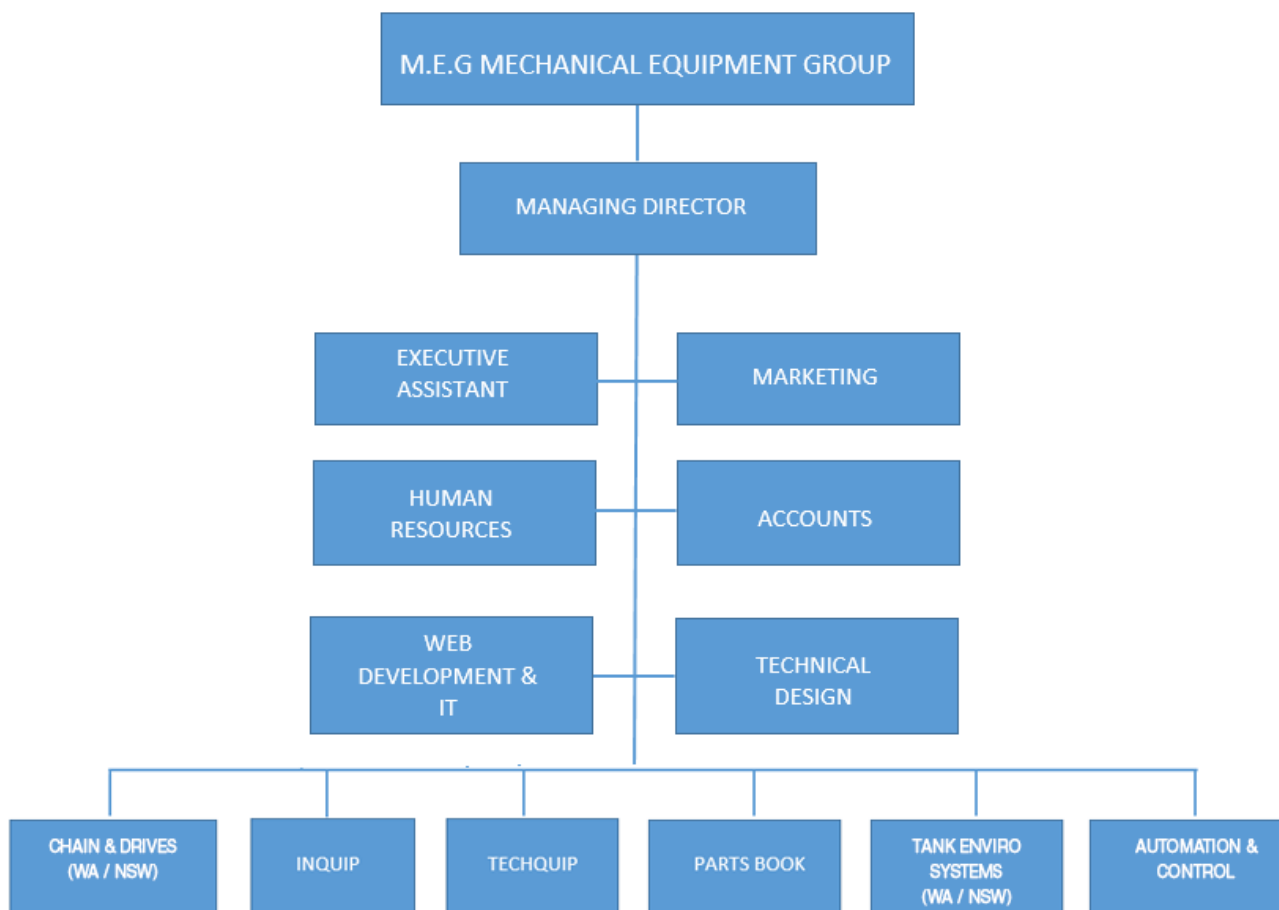

Our partnership with our clients across these sectors allow us to share knowledge gained from previous experience with you.

Our sector services and knowledge includes Design, Supply, Installation and Maintenance services.

MEG Group Structure

Continuing to grow to meet our industry needs.

MEG Industry Sectors

We have many years of experience in all industry sectors across Australasia.

Our knowledge and specialised product development provides you with a level of service and proven results that you can rely on to achieve greater productivity and results.

Through developing these processes we have an improved understanding of your business and application requirements.

With high level partnership and understanding we offer solutions that are efficient, competitive and beneficial to businesses.

Our partnership with clients across these sectors allows us to share a wide range of knowledge gained from previous experiences.

Our sector services and knowledge includes Design, Supply, Installation and Maintenance services.

MEG Services

SERVICE RANGE

Design

Our engineering team are proficient in the use of cutting edge drawing software, utilising AutoCAD and SolidWorks in the production of full 3D virtual space modelling and simulation, enabling prompt and accurate project installation and future servicing.

Supply

From our Group of companies, we are able to supply a large range of our products from stock. We represent various brands from around the world; our association with many power transmission and bulk materials handling manufacturers allow us to provide the most economical solutions.

Installation

Once your design is complete and equipment supplied, our Techquip Division can provide installation services to complete your project. Some of our value added services include project estimating, costing, scheduling, resource management and equipment hire; meeting our client's confidence in completing their project's unique requirements. After installation we also provide full commissioning of equipment and supplied systems.

Maintenance

Techquip can provide full and ongoing maintenance services for all your plant and equipment, including gearboxes, motors, drive controls, conveyor components, head drums, replacement skirting and belting, dust collectors and drive assemblies. Effective servicing and maintenance can be the difference between reliable, efficient equipment and one plagued with continuing problems, costing you time and money.

MEG Chain & Drives

COMPLETE POWER TRANSMISSION

Chain & Drives was established to become the leader in Power Transmission. To complement our range of products, we offer initial concept design of your project and specialised requirements, by utilising our 3D drafting and modelling systems. Our team will manage your project in all stages through design, supply, installation, commissioning and maintenance.

We have vast project experience in building & construction, crushing & screening, recycling plants, fertiliser plants, food production, plastics & chemicals, environmental technology, renewable energy and heavy industries.

We are able to offer advice based on our experience with all aspects of your conveyor requirements.

Our sales and engineering team use cutting edge drawing software, utilising Auto CAD and Solid Works in the production of two dimensional layout drawings three dimensional modelling. Both of these technical software applications greatly assist in the very best installation of conveyor drive assemblies.

We only represent leading quality power transmission products from around the world. We are also able to design and manufacture specialised products to meet our clients requirements.

POWER > SPEED > TORQUE

TRANSDRIVE®

MEG Inquip

BULK MATERIALS HANDLING

Inquip distributors a large range of bulk materials handling, processing and monitoring equipment.

The equipment range has been developed to assist the following industrial categories:

- Cement Production & Batching Plants
- Mining & Processing Plants
- Municipal Waste Plants
- Waste Water Treatment Plants
- Quarrying
- Crushing & Screening Plants
- Lime Dosing & Flocculent Plants
- Silo Storage & Powder / Granule Metering
- Bag Loading & Unloading Plants
- Horticultural & Agricultural Facilities
- Grain & Fodder Processing Plants

We are also able to design and manufacture specialised products to meet our clients requirements including our Modquip modular conveyor systems.

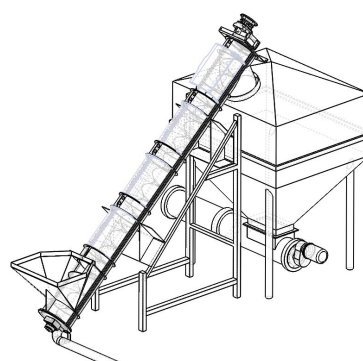

MEG Techquip

TECHNICAL SERVICES

Techquip a leading supplier of technical engineering services for Power Transmission, Bulk Materials Handling and mechanical services. Our services include design, installation, maintenance and mechanical & diagnostic capabilities.

Techquip is the technical services provider division in our group of companies which include Chain & Drives a leader in power transmission and Inquip a specialist in bulk materials handling.

Our team are trained in all aspects of power transmission and bulk materials handling and have the support and expertise of Chain & Drives and Inquip along with the market leading products our group supplies throughout Australia from leading manufacturers around the world.

MEG Automation & Control

ROBOTICS, AUTOMATED SYSTEMS & PROCESS CONTROL SOLUTIONS

Automation & Control are a leading supplier of robotics, automated systems and process control solutions.

Our team combine our mechanical and electrical engineering knowledge with our market leading range of products. This provides our partners with economically reliable automated systems that maximise production and reduce costs.

From loading pallets to picking and packaging of products, we can provide an economical automated process to an autonomous system adding value and improving your business.

ROBOTICS

- Picker placer
- Multi-axis robots
- Automated packaging
- Pallet handling & dispensing
- Cence per-motion services

DRIVE CONTROLS

- Servo motors & drives
- PLC programming
- VSD drives systems
- Plant & Equipment control systems
- Drive enclosure manufacture

CONVEYOR & PACKAGING SYSTEMS

- Modu conveyor systems
- Modu restaurant food delivery systems
- Paglierani packaging systems
- Product dosing & handling systems
- Product weighing & dispensing
- Food & picking & packaging systems

MEG Tank Enviro Systems

POLYCHEM SCRAPER SYSTEMS & WASTE WATER TREATMENT

Tank Enviro is the distributor of Polychem Scraper Systems and associated Waste Water Treatment Products manufactured by Brentwood Industries. Tank Enviro Systems are part of the Mechanical Equipment Group, which also includes Chain & Drives, a leader in power transmission; Inquip, a Bulk Materials Handling provider; and Techquip, technical services specialists.

Our team is trained in waste water treatment, associated power transmission and bulk materials handling products. We have the support and expertise from market leading manufacturers across the globe, enabling us to provide our products and services throughout Australasia including the below:

- Polychem Chain & Flight Scraper Systems
- Innovative Waste Water Treatment
- Tube Settler Systems
- Complete Gearbox/ Drive Systems
- Sediment Dredge System
- Skimmers & Scum Pipes
- Condition Assessment Reports
- Specialised Products
- 3D-Modelling & Design
- Site Services
- Power Transmission Products and more..

MEG Parts Book

ESSENTIAL PRODUCTS

Our market has never been more exciting, fast paced and rapidly expanding than it is today. The responsibility on suppliers to innovate and evolve with this climate continues to grow as a critical element in the success we enjoy today. Parts Book is dedicated to equipping our clients with simple and efficient procurement services through our forward thinking approach and multi-tiered structure, providing our clients with tools required to grow and excel within their respectful industry sectors. Parts Book offers an extensive range of quality products, application design facilities and our powerful Online Marketplace. Backed with years of industry experience, Parts Books' polite, knowledgeable staff & supply partners offer premium customer service from initial design stages, through to post installation care.

MEG e-Marketplace

MARKETPLACE

Parts Book Marketplace is an online procurement hub that connects our clients with quality manufacturers and suppliers locally, nationally and internationally.

By identifying the existing requirement for an all-inclusive facilitator across sectors such as mining, industrial and commercial, Parts Book has eliminated the time consuming and tedious undertakings that buyers repeatedly endure.

Features:

- Online Tendering
- Engineering Services
- 24/7 Estimating Utilities
- Live Order Tracking
- Powerful yet simple search & compare tools

TRADEMARK RANGES

Parts Books Trademark Ranges are individually selected by our Business Development team to carry the Parts Book brand. Recognised for outstanding engineering, superior quality and remarkable innovation, products wearing our name are judiciously chosen with no substitutes considered. As a prerequisite, all products must first meet stringent qualification criteria's that are designed and executed by Parts Book to ensure our high standards of quality control are upheld.

TENDERS

Parts Book Tenders, an online-based utility, offers a platform for clients to submit project bundles and/or specialty items into a comprehensive network of trusted suppliers and manufacturers. Parts Books handpicked Supply Partners are immediately alerted to Tender Requests that are submitted containing items pertaining to their respectful field(s) and respond with competitive quotations and relevant specification.

MEG Online

Mechanical Equipment Group incorporates innovation in every aspect of our businesses encouraging us to continue to improve and expand our online services and capabilities. We are continuously improving our company websites and will be introducing an E-Commerce, Knowledge Centres and Online Support Services with our technical service team.

The collage displays the following website content:

- MEG Main Website:** Features the MEG logo, the text "MECHANICAL EQUIPMENT GROUP", and a "NEW WEBSITE COMING SOON!" banner. It includes social media links for Facebook, LinkedIn, and YouTube, and a "Download Corporate Profile" button.
- CHAIN & DRIVES:** A website for "POWER • SPEED • TORQUE" with a focus on "Leaders in Power Transmission in WA & NSW". It lists services like design, supply, installation, and maintenance for agricultural, mining, and industrial sectors.
- TECHQUIP:** A website for "DESIGN • INSTALLATION • SERVICE" offering maintenance, installation, and design services for bulk materials handling and power transmission. It lists various equipment like gearboxes, bearings, and dust collectors.
- INQUIP:** A website for "PRODUCT • DENSITY • FLOW" specializing in "Leaders in Bulk Materials & Dust Handling in WA". It offers supply of market leading products and technical engineering services.
- PARTS BOOK:** A website for "MECHANICAL GAS MATERIALS HANDLING ENGINEERING COMMUNICATIONS" featuring "PB ESSENTIALS" for civil, mining, and electrical services.
- TANK:** A website for "Enviro Systems" with the tagline "WATER • PROCESS • INNOVATION", focusing on "Market leaders in Waste Water and Potable Water Treatment".
- AUTOMATION & CONTROL:** A website for "MODU Conveyor System & Express Delivery System" featuring "MODU Conveyor Systems" and "MODU Express Delivery".
